

## Instructions for Monitoring Eastern Bluebird Nestboxes

- Clean out all nesting material before March 15.
- Use gloves. Deposit old nest away from nestbox and in garbage can if possible. Do not litter manicured grounds.
- Try to check on houses once a week.
- Tap on house before opening it.
- **Record** all observations on **Nestbox Activity Form**.
- **Remove house sparrow nests and eggs.** It is illegal to interfere with any other species except starlings.
- If it is extremely hot, female won't spend a lot of time on nest incubating eggs. Don't think she has abandoned them. However, if you can determine that eggs are abandoned, remove all eggs *and* nesting material.
- Try to predict when nestlings will fledge by date of eggs laid or date babies hatched. Record success if nestlings are alive close to day they should fledge.
- Don't open box after day 14. Nestlings may make premature flight.
- Clean out nest when babies fledge (once they fly out – they don't return to the nestbox).
- Be cautioned that there is a lot of heartbreak along the Bluebird Trail. Expect dead birds from predators or unknown causes. Always clean out houses after these disasters.
- Email Sandy with news of bluebirds present (sandym@cloud9.net)
- Send forms to Sandy Morrissey at end of season – late August.  
39 Hawthorne Way, Hartsdale, NY 10530, Phone 949-2531, Fax 686-1737

**Eastern Bluebird**

Neat round nest  
Grass or  
Pine needles

4-5 blue eggs  
(can be white)  
Incub. 12-14 days  
Nest. 16—22 days  
Broods 2-3

**Tree Swallow**

Neat round nest  
Grass or  
Pine needles  
FEATHERS on top

4-7 white eggs  
Incub. 14-15 days  
Nestlg. 16-22 days  
Broods 1

**House Wren**

Nest built of sticks  
  
6-8 brown eggs  
Incub. 12-16 days  
Nestlg. 15-19 days  
Broods 2-3

**Black-capped Chickadee**

Nest built with moss  
  
6-8 brown eggs  
Incub. 12-13 days  
Nestlg. 16 days  
Broods 1

**Tufted Titmouse**

Nest built of moss  
and bark  
  
5-6 brownish eggs  
Incub. 12-14 days  
Nestlg. 15-16 days  
Broods 1

**House Sparrow**

Nest built with  
grasses and "trash"  
material. Box full  
and messy.

4-6 brownish eggs  
Incub. 10-13 days  
Nestlg. 14-17 days  
Broods 3-4
